

ENVIRONMENTAL TESTING SOLUTIONS

Engineering Thermal Precision for Reliable Validation

Environmental test chambers, integrated thermal systems, lifecycle services, testing support, and flexible rental solutions for demanding industrial and laboratory applications.

Therm-X Innovations Pvt. Ltd.
Peenya Industrial Area, Bengaluru

WHO WE ARE

Built Around Engineering Accuracy

Therm-X Innovations combines refrigeration, electrical controls, mechanical integration, and application engineering to deliver reliable environmental testing platforms.

Based in Bengaluru's Peenya Industrial Area, Therm-X Innovations designs and manufactures environmental test chambers for qualification, reliability, durability, and standards-based validation.

Our focus is accurate, repeatable, safe, and application-oriented testing supported through installation, service, refurbishment, testing, and rental solutions.

Product families

360°

Lifecycle support

Custom

Application engineering

Precision Engineering

Stable, uniform, and repeatable test conditions.

Standards Focus

IEC, ASTM, ISO, DIN, MIL, and customer requirements.

Application Support

Configuration aligned to specimen, profile, safety, and use case.

Long-Term Reliability

Installation, AMC, service, retrofit, and life extension.

PRODUCT PORTFOLIO

Environmental Test Chambers

Core platforms for temperature, humidity, shock, altitude, battery, rain, and dust testing.

Environmental Test Chamber

Temperature and humidity simulation for qualification, reliability, and durability testing.

Thermal Shock Series

Rapid hot and cold transitions for material integrity and thermal fatigue evaluation.

Altitude Series

Low-pressure and combined environmental simulation for aerospace and defence applications.

Battery Test Chambers

Controlled environmental platforms for EV, battery, and energy-storage validation.

Rain Chambers

Water-ingress testing from IPX1 through high-pressure application-specific systems.

Dust Chambers

Dust-protected and dust-tight ingress testing with controlled particle circulation.

SPECIALIZED PLATFORMS

Integrated & Application-Specific **Solutions**

Combined and custom systems for mechanical, material, corrosion, and thermal-processing applications.

Vibration Shaker Integration

Combined climatic and vibration testing around compatible electrodynamic shaker systems.

UTM Integration Chambers

Controlled temperature environments for tensile, compression, and fatigue testing.

Corrosion Test Chambers

Accelerated salt spray and cyclic corrosion exposure for coatings and materials.

Industrial Ovens

Reliable heating, drying, curing, and thermal-conditioning solutions.

Standard Platforms. Custom Engineering.

Systems can be configured around volume, temperature and humidity range, ramp rate, safety interlocks, specimen loading, control architecture, data logging, and integration requirements.

FULL LIFECYCLE SUPPORT

End-to-End Services

Support from concept and manufacturing through operation, refurbishment, testing, and rental access.

Design & Manufacturing

Standard and custom chamber design, refrigeration, electrical controls, mechanical integration, factory testing, and validation.

Responsive Service Support

Installation, commissioning, preventive maintenance, breakdown support, AMC, calibration coordination, and spare support.

Refurbishment & Upgradation

Refrigeration retrofits, PLC/HMI modernization, energy improvements, safety upgrades, and equipment life extension.

Testing Services

Temperature, humidity, thermal cycling, thermal shock, dust, rain, corrosion, battery, and application-specific testing.

Flexible Rental Solutions

Hourly, daily, weekly, and monthly access to ready-to-use testing systems with technical and maintenance support.

LET US DISCUSS YOUR REQUIREMENT

Connect with **Therm-X Innovations**

Share your product, testing, service, retrofit, or rental requirement. Our team will guide you toward the right technical and commercial solution.

Engineering Support

Share chamber requirements, testing profiles, service issues, refurbishment needs, or rental duration.

Facility

#41A/11, 2nd Cross, 2nd Phase,
Peenya Industrial Area,
Bengaluru - 560058, Karnataka, India

Send Your Test Requirement

Include chamber type, specimen size, range, ramp rate, applicable standard, safety requirements, and required delivery timeline.

Support Requests

Include chamber make/model, issue description, photographs, alarms, and site location for faster support.

Reliable Chambers. Repeatable Results

Environmental testing solutions designed and supported in Bengaluru.
